

TOUCH SELECT - 2 BAY DOOR WIRING HARNESS SCHEMATIC

NOT REQUIRED FOR INSTALL, IT IS AN INDICATOR LIGHT, IN THE EQUIPMENT ROOM, TO SHOW THAT THE TIMER IS ACTIVE ("ON") IN THE BAY.

THE NUMBERS CORRESPOND WITH THE FUNCTIONS ON THE BAY DOOR. DO NOT COUNT "STOP", STOP = "0" AND DOES NOT HAVE A WIRE! ALL TERMINATE AT MASTER TERMINAL STRIP IN EQUIPEMENT CONTROL BOX.

EXAMPLE:
IF THE FIRST FUNCTION UNDER "STOP" IS "TIRE CLEANER" THEN CONNECT THE #1 WHITE WIRE TO YOUR "TIRE CLEANER" CONNECTION ON YOUR EQUIPMENT MASTER TERMINAL STRIP.

IF YOU HAVE THE SAME FUNCTION (LIKE RINSE) WITH MORE THAN ONE BUTTON, CONNECT THOSE WIRES TOGETHER WHEN CONNECTING TO YOUR EQUIPMENT, ie: SAY IF RINSE IS #6 AND #10 POSITIONS, CONNECT THEM TO THE SAME CONNECTION ON YOUR EQUIPMENT MASTER TERMINAL STRIP.

24V AC POWER SUPPLY AT MASTER TERMINAL STRIP IN EQUIPEMENT CONTROL BOX

NOTE:
ALL RED WIRES ARE 24V AC "HOT"
ALL PURPLE WIRES ARE 24V COMMON
