

# Clear Coat Protection System

The extra function you've been looking for!

**What** A self-service spray unit which applies a specialized protectant for Clear Coat automotive finishes.

**Why** Virtually all new vehicles come with Clear Coat finish. Manufacturers recommend protectants formulated for this purpose.

## What about self-service waxes?

They certainly have a place among self-service options. However, these conventional waxes do not safeguard Clear Coat finishes as effectively as specialized protectants.

**How** The system utilizes a separate wand which is used only for Clear Coat protectant.

Included in the Dilling-Harris package are:

- Stainless steel tank, pump and solenoid unit
- Foam generator with mounting brackets
- Special signage strips for master menu
- Colorful pictorial signs showing application of the protectant
- Wand and hose assembly
- Clear Coat protectant in six-gallon containers

**When** Order this unique system *today*.

You'll find, as other car wash operators have, that many customers will use the Clear Coat protectant regularly. And you'll love the high profit margin this system provides.

The sooner you order, the sooner you'll be enjoying extra revenue!

*Optional: Tri-Color System (Red, White & Blue) Available*

▲ Here's the top-quality material which comes with every unit. (See details on this page)

▲ Clear Coat protectant is easily applied, using a separate wand designed only for this purpose.

**Easily add this profit center to your car wash now.**

*Often Copied, Never Equaled.*
