

Boom! Boom!

Dual booms featured in FluidTek™ Boom System

Now, from Dilling-Harris, comes the patented* FluidTek Boom System for self-service bays. With a 360° "Spider" installed in the center of the bay, it allows separate booms to deliver foam brush and high-pressure functions.

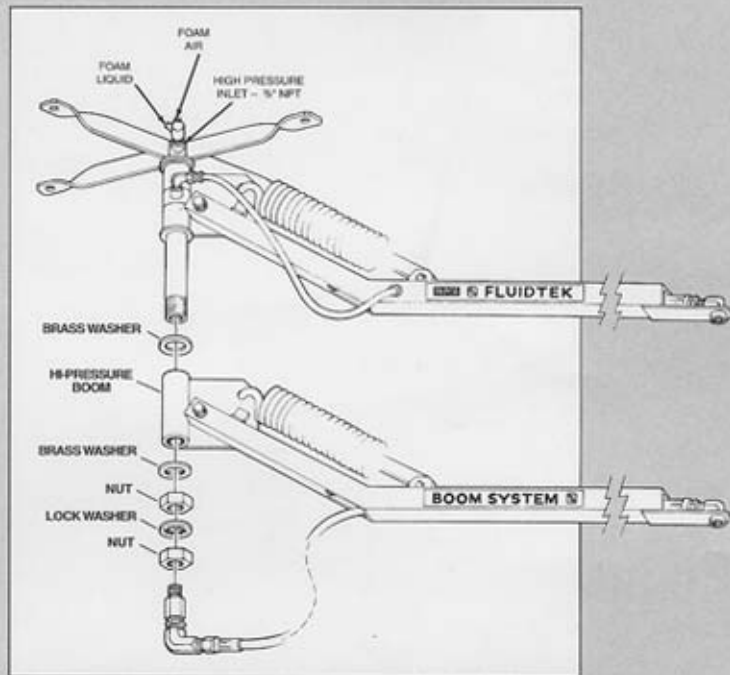

Each boom provides 70° vertical and 360° horizontal travel.

Increase the time of foam brush use up to 25% over wall-mounted boom systems!

Say good-bye to side-mounted 180° booms, always unsightly and hard to use. FluidTek booms are easily installed and easy for your customers to use. (So your foaming brush revenue increases!) FluidTek units feature the D-H "Super Boom" construction. This means stainless steel components throughout. All fittings are brass and springs are chrome-plated.

Dimensions:	Arm Length	Shaft Length
#31086	75" HP/84" FB	13"
#31088 Extended Shaft	75" HP/84" FB	18.5"

All spider mounting holes are on 16-1/4" centers.

It's another innovative system from Dilling-Harris, the leader in self-service carwash equipment. Call toll-free 1-800-727-4122 for the name of your nearest D-H distributor.

Often Copied, Never Equaled.
